

How to join for free & add funds into CashFX

STEP 1

You'll need to FIRST get a Virtual Private Network (VPN), and then log into it through any server outside of the US - i.e. London, UK, England, Japan (outside of the US).

Here are 2 choices for VPN (less than \$3/month):

1. ExpressVPN https://www.privateinternetaccess.com/offer/save-now?aff_id=7760&brand=wct&source=gene&aff_sub2=ggl-s-en-usa-gen&aff_sub=bvv-8988593-pia
2. Surfshark VPN <https://surfshark.com/>

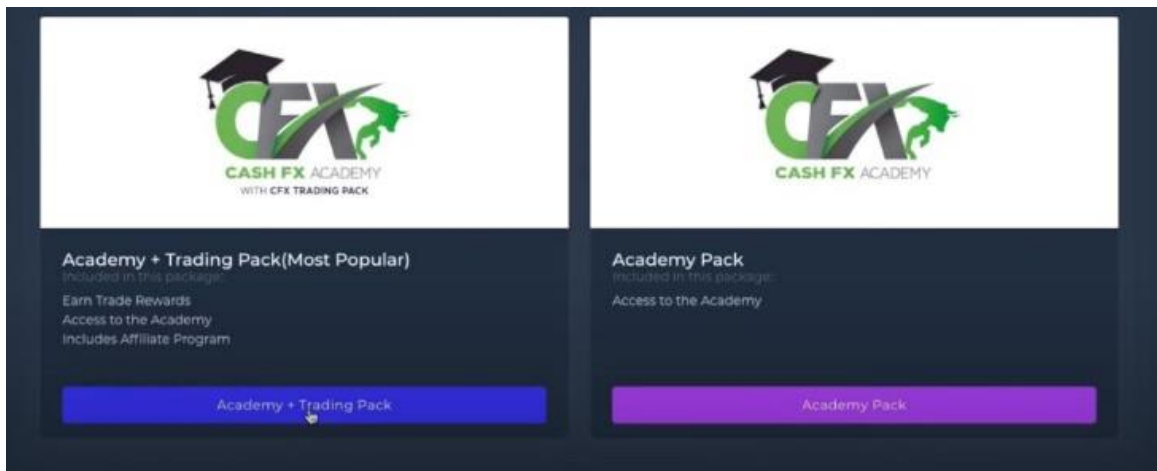

STEP 2

Log into your VPN before creating your free account and every time afterwards – Log into your VPN before you log back into your Cash FX portal.

Create Your Free Account by Clicking REGISTER on the top right corner using your sponsor's referral link: williamreynolds9.cashfxgroup.com

STEP 3

How to fund your Initial Investment amount. From your CashFX portal, choose "Academy + Trading Pack" on the left side in blue.

Choose your “Ad Pack” - Investment amount - \$300, \$500, \$1,000, \$3,000, \$5,000, \$7,000, \$10,000, \$15,000, \$20,000, \$30,000 etc..up to \$100,000 max.

Cash FX accepts Bitcoin (BTC) as the form of payment..we don't invest in BTC, we simply buy BTC with Cash (USD), and then transfer it into CFX. BTC is well respected and trusted “Virtual Money”. Take your time when copying/pasting, going through each of the steps making sure to not make any mistakes ...and do not double-click on any of the links throughout this process.

STEP
4

A. Open up your Free Coinbase Account using this referral link (it gives you a \$10 credit when using this link): https://www.coinbase.com/join/reynol_c64

B. From inside of Coinbase, Buy the BTC amount needed for your Ad Pack (plus the SMALL XFER FEE for your investment choice) Use your Debit Card or Bank - Debit Card for faster purchase! Buy an extra \$20 worth of BTC to cover the fee (Buy \$1,020 = 0.01830883 BTC if you want to invest \$1,000). FYI: The value of “BTC to USD” constantly changes. You can Google "BTC to USD" for an estimated amount of BTC that's currently needed.

C. After your BTC purchase is “cleared”, Go back inside your CFX Portal and COPY the link ADDRESS that you'll be SENDING BTC TO ->

Then Go inside Coinbase -> Click on “Portfolio” -> Click on “Bitcoin” -> SEND the EXACT AMOUNT of BTC by PASTING the same link ADDRESS into Coinbase that was copied from inside the CFX portal. Write down the factor found inside of your CFX portal that's needed – i.e. 0.01830883 - and SEND the EXACT AMOUNT to the link ADDRESS - Make sure the last 4 characters of the link ADDRESS are a match. -> [See this Video](#)

D. Complete the transfer..."Confirm BTC Send" in Coinbase -> Verify the Amount (BTC Factor is correct) -> Complete & Confirm via 2 step (Verification Code).

STEP

5

Using **CASH APP instead**. You can buy BTC and transfer it into CashFX using **Cash App** also. -> [See this Video](#)

You're good to go when you get the CHECK MARK. ✓

Watch your contract grow with NO MONTHLY FEE!!
